

TSS-1 Cut Sheet

Features

- Seamless Connection with Water Detector
- Plug & Play

Overview

Additional detector can be added to the WD-1 by using the TSS-1 / T-splitter and water detector (sensor) set. It comes with a T-splitter and an additional water detector in order to have multiple points to detect water by using a single WD-1 module. This is useful when trying to monitor for water spills or floods, or to monitor water run-off at multiple locations.

T Product Specifications

Package Content

1 x Touch Spot
1 x T-Splitter Touch Spot

Working Environments

Temperature 32-122°F, Humidity=90%

Packaging Dimensions

156mm(L) x 83mm(W) x 30mm(H)
